PROJECTS

React-Gym 🌐

React-Gym is a dynamic and feature-rich fitness application built with React. It offers users an intuitive platform to explore a wide variety of exercise categories and target specific muscle groups. The app boasts a database of over 1,000 exercises, complete with practical examples to guide users in their fitness journey. It includes seamless pagination for easy navigation, detailed exercise descriptions, and the ability to fetch and display related video content directly from YouTube. Additionally, React-Gym highlights similar exercises to provide users with diverse workout options, ensuring a comprehensive fitness experience. Achieved a 30% increase in user engagement by incorporating more than 1,000 exercises with practical examples, interactive features, and YouTube video integrations.

FreshCart 🌐

an e-commerce website designed to enhance the online shopping experience with a wide range of features! Key features of the project include: User Authentication: Seamless login and registration processes. Product Details: Detailed product pages with images, descriptions, and ratings. Shopping Cart & Checkout: Easy-to-use cart system with secure checkout options. Responsive Design: Optimized for both desktop and mobile users. Real-Time Updates: Product availability and prices are updated in real time it's a great achievements .

React-Dashboard 🌐

React-Dashboard is a robust, fully-featured admin dashboard application developed using React. This project offers a wide array of pre-designed pages designed to enhance administrative efficiency and support detailed data visualization. Key features include dynamic team management, contact records, invoicing pages, React-based forms with real-time validation, and an interactive calendar.

3D-Portfolio 🌐

The world's most impressive websites leverage cutting-edge 3D graphics and dynamic animations to create immersive and engaging experiences, captivating users while bringing their content to life and strengthening their branding

React Portfolio 🌐

A dynamic and interactive website built with React, designed to showcase my skills, professional experience, and diverse projects. This portfolio acts as a personal branding platform, effectively highlighting my technical expertise in frontend development and demonstrating my ability to create visually appealing and user-friendly web applications

SKILLS

Frontend:

- HTML5, CSS3, SASS, Bootstrap, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Redux, Next.js, RESTful APIs, Axios, Dynamic Layouts

State Management:

- Context API, React Query, Redux Toolkit

Soft Skills

- **Deployment:** Netlify, Vercel.
- **Languages:** Node.js, JavaScript, Python, Java, C++
- **Frameworks:** Express.js
- **Problem Solving:** C++, JavaScript

Version Control:

- Git, GitHub

Other Tools & Libraries:

- Node.js, Express.js, npm, Yarn, Styled Components, Material-UI, Ant Design

EDUCATION

Computer Science and AI

Benha University, Graduation Year

2021 – 2025

CERTIFICATES

- SEF Academy
- Digital Egypt Pioneers Initiative
